FREIGHT TRANSPORT ASSOCIATION

Urban Logistics Conference • 10 March 2010

Embracing urban delivery best practice

Establishing an effective urban freight access and delivery framework

Managing the conflict between efficient deliveries and legislation

Environmental obligations linked to air quality and intrusion

What makes a successful urban consolidation centre

Ensuring safe deliveries and vehicle movements

Quiet deliveries

Ensuring compliance, advancing performance

FTA's annual Urban Logistics Conference will help you develop an understanding of the current issues, best practice and policy developments affecting urban freight deliveries. Such deliveries need to be carried out in a safe and sustainable manner, considering access and unloading time constraints, the impact on other road users and the increasing environmental obligations.

Businesses and local authorities share a joint goal in the efficient management of goods deliveries in crowded towns and city centres. It is paramount that both parties' requirements are understood to create workable solutions that seamlessly service the demands of local businesses and residents.

Key topics include:

- establishing an effective urban freight access and delivery framework
- managing the conflict between efficient deliveries and legislation
- environmental obligations linked to air quality and intrusion
- what makes a successful urban consolidation centre
- ensuring safe deliveries and vehicle movements
- quiet deliveries

Date and venue

Date: Wednesday 10 March – 09.30 until 16.15

Venue: One Great George Street, London SW1P 3AA
