Venue: **City Tower, New York St, Piccadilly Plaza, Manchester M1 4BT**

Overview

The NHS in England is currently undergoing one of the largest reorganisations since its creation. Changes cover budgetary management, new clinical commissioning groups, greater local authority involvement, and so on.

The changes raise new opportunities for the transport and health sectors to enable achievement of mutually beneficial aims. Stronger links between the two sectors can help us to achieve improved health of the population, reduced levels of obesity, and a reduced resultant strain on NHS budgets through embedding active travel into the population's daily lives. This event will provide an opportunity to identify the support both health and transport professionals can call on, to assist with development and delivery of complementary programmes now and in the future.

The presentations will be followed by a question and answer session.

We look forward to seeing you there – **members and non-members welcome**. This event is free to attend for TPS/IHT/ILT/ICE/RTPI members (please bring your membership card with you); a £5 charge will be made for non-members. Lunch will be provided.

CPD certificates for TPS members will be available.

TPS require that all attendees register for the event in advance (places are limited). Please reserve your place online at <http://www.ice.org.uk/Event?ID=2228> or contact cheryl.maud@ice.org.uk if you have any difficulty. For all other event enquiries please contact Stacey.Silverman@jmp.co.uk
