

Tuesday 9th October 2012
17:30 for prompt start at 18:00

National Roads Telecommunications Services (NRTS) Project

Event Location:

**GeneSYS, 9 Ridgeway, Quinton Business Park, Birmingham B32 1AF
(and West Midlands Regional Control Centre)**

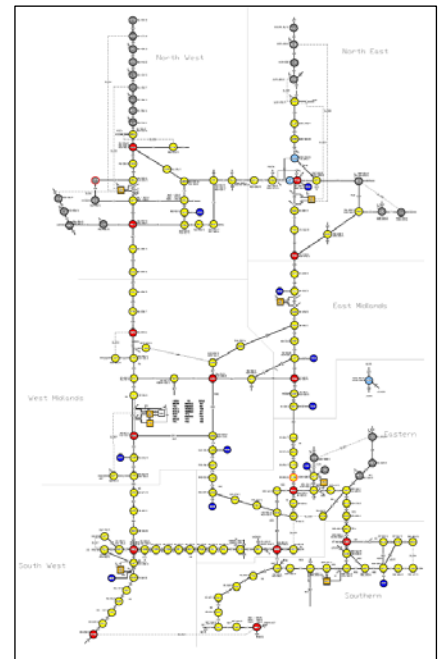

The NRTS Project provides services across the Highways Agency's roadside telecommunications network. GeneSYS Telecommunications Ltd. is a special purpose vehicle formed by HSBC and Fluor to manage the NRTS Project in a Public Private Partnership with the Highways Agency.

The projects aims are to upgrade, operate and maintain the communications systems that link the roadway communication devices such as emergency telephones, CCTV cameras, etc. along the motorways and other main "A" roads in England with the national traffic control centre and regional control centres.

TPS West Midlands in partnership with the Highways Agency and GeneSYS invite you to learn about how the project forms a fundamental part in keeping our roads moving and the opportunity to visit the West Midlands Regional Control Centre (WMRCC).

Format of the evening:

- 17:30 - 18:00: Registration and refreshments at GeneSYS
- 18:00 - 19:00: Presentation of the NRTS Project by **David Bradbrook** (NRTS Project Contract Manager, Highways Agency) and Q&A session
- 19:00 - 20:00: Visit to the WMRCC (subject to operational impacts) hosted by **Stephen Bird** (Control Room Team Manager, Highways Agency)

Refreshments will be available from 17:30

This is a free event open to both TPS members and non-members

Please confirm your attendance via email at your earliest opportunity as we expect demand to be high and places are strictly limited

Register your place by emailing amrit.mudhar@fluor.com
